

Argentis Consulting software factory

Argentis Consulting is proud to inform that have joined forces with H+A, a CMMI2 certified Software Factory to offer SAP ABAP development.

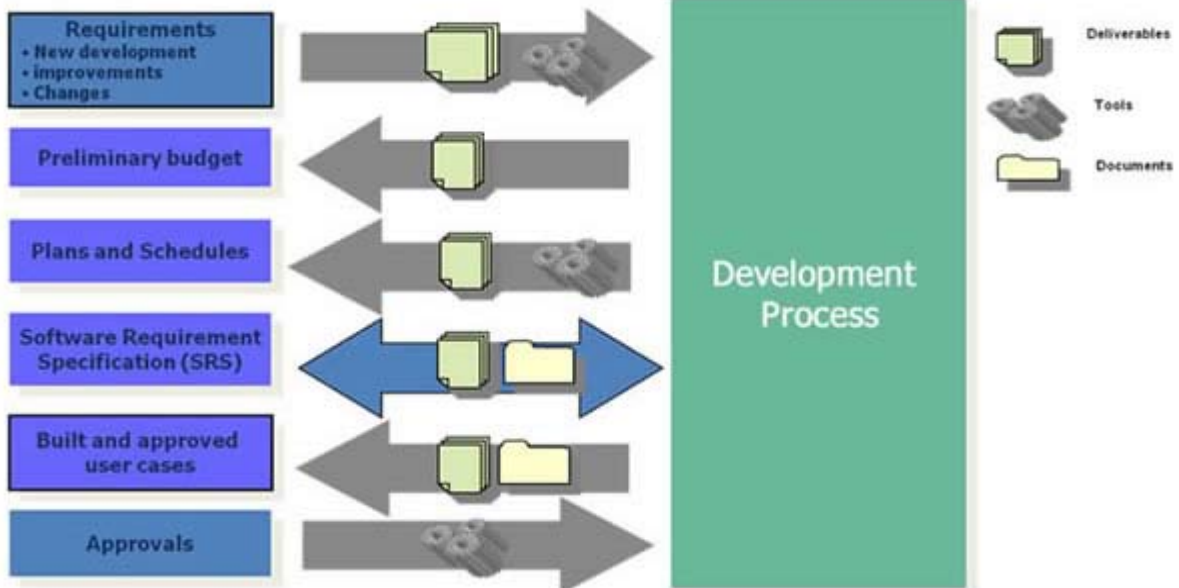

Our approach to software development has been thoroughly designed to provide our Customers with speed, agility and quality.

The key factor that enables us to offer such a desirable mix of qualities is our methodology; acquired during many years of hands-on experience, proven successful models, a deep understanding of the software development industry, and a strong emphasis in quality processes.

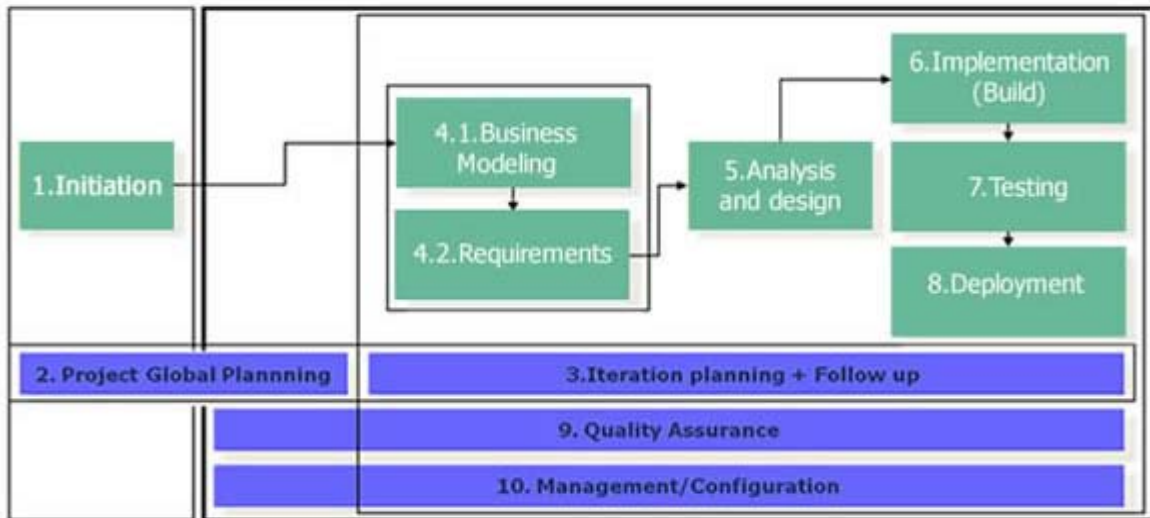

Why Argentis?

- Our proactive approach involves us with the Partner during the sales cycle process, in order to propose the right solution to the customer.
- Clear Methodology to work with existing partner's developer team.
- Obtained CMMI2 certification in 2005, committed to a continuous strives for quality and excellence in software development. CMMI3 in Progress. <http://www.sei.cmu.edu/cmml/>
- We have developed products, customizations and integrations for the US, LATAM and many others countries.
- Software Quality Assurance: we believe that investing in this area will greatly reduce bugs and support and eventually improve customer satisfaction.
