

Changer Professional

Change and Merge SAP Business One Data and Reformat the Account Segmentation

Has your organization outgrown its chart of accounts?
Does modifying your account segments seem impossible?
Have you recently completed organizational restructuring or growth?

If you answered “yes” to any of these questions, Changer Professional can help.

Modifying Your GL Account Segmentation

Changer Professional enables users of SAP® Business One to grow, evolve and modify their GL Account Segmentation, their financial management systems and their business.

Changer Professional seamlessly re-formats the chart of accounts and account structure, instantly altering the format of all the data, including maximum account length, size of segments and number of segments. All the historical data is modified as the old account segmentation is mapped to the new account segmentation.

Changer Functionality

In addition to re-formatting the chart of accounts and account structure, Changer Professional provides users with all the features and functions of Changer.

Fast and Effective

In a straightforward process, SAP Business One users can:

- Transform their account segmentation.
- Maintains the integrity of financial systems during periods of organizational restructuring and growth
- Offers control over the chart of accounts
- Modifies the account structure to enhance reporting requirements and improve data output
